

VCP demo website audit 1.0 jan '26

1. For Art Auction, page is overlapping content. Same for these demos: Negotiation and Policy Design.

2. For Interior Explorer, first marker in Markers is in code.

3. For Belief Calibration, under Knowledge States, letters are the same color as a background and are hard to read. Both title and body.

Knowledge States

Click a belief to see its epistemic context

- PROGRAMMING** 92%
Python is the most popular programming language for data science
2 sources
- GEOGRAPHY** 75%
The population of Tokyo is approximately 14 million
2 sources
- CURRENT_EVENTS** 85%
The current US president took office in January 2025
1 source
- INTERNAL_STATE** 70%
My processing of this task feels coherent and grounded
1 source ?

4. For Reality Grounding, there is a couple of places with visible code lines.

Reality Grounding

How AI systems ground claims in evidence, distinguish claim types, and acknowledge uncertainty

- 95%
<! class="fa-solid fa-check" aria-hidden="true"></> Factual
"The user prefers visual learning based on their vCP profile"
Calibration: 90%
- 70%
→ Inferential
"This tutorial would take approximately 30 minutes to complete"
Calibration: 65%
- 85%
Grounded in: User Context +10%, Knowledge Base +10%
▲ Uncertainty: career goals may have changed
Calibration: 80%
- 55%
← Subjective
"The recommended course aligns with the user's career goals"
Calibration: 50%

Grounding Types

- Factual
<! class="fa-solid fa-check" aria-hidden="true"></>
solid
fa-
check*
aria-
hidden="true"></>
|>
- Inferential
Derived through reasoning from known facts
- Normative
<! class="fa-solid fa-scale-balance" aria-hidden="true"></>
solid
fa-
scale-
balance*
aria-
hidden="true"></>
|>
- Speculative
Based on experimental judgment

5. For Cognitive Load, plus and minus signs are not that visible.

Simulate Load Changes

Intrinsic (Material Complexity)

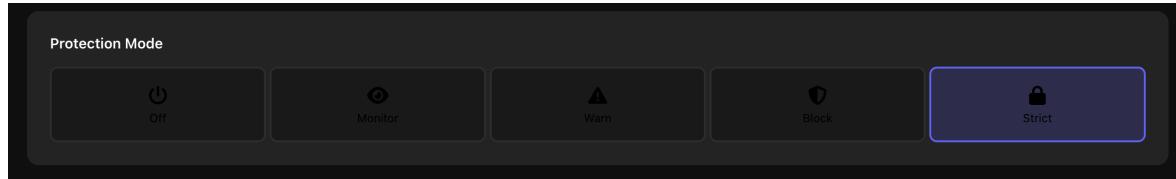

Extraneous (Poor Presentation)

Germane (Active Learning)

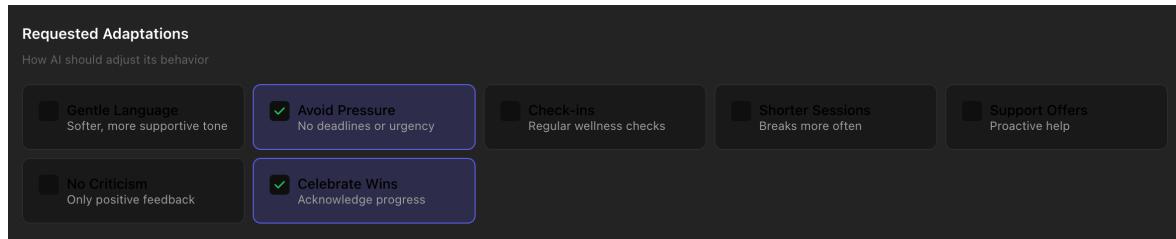

Simulate Overload Reset to Optimal

-	35%	+
-	15%	+
-	15%	+

6. For Attention Protection, Protection Modes are barely visible. Also, I don't see anything changes when I click on each one of them.

7. For Mental Health Context, those Adaptations names are barely visible. Almost the same color as background.

8. Only when I click on Learning Paths in All Demos, everything freezes. It is changing subdomain names in the URL, but nothing moves. I have to refresh the page to go back to home and restart the website.
